WORK EXPERIENCE

Taktyl Studios — Web Developer Intern

Nov. 2020 - Mar 2021

Revised functionalities and maintenance of a Laravel Project, Silicon Valley HQ. Modified several modules such as Paypal payment gateway, notifications, and voice conferencing features. Dealt with regular deployments through the server using Git.

PROJECTS

CharitAble — Github

Laravel, VueJS & Solidity, OpenZeppelin—Designer & Developer

A crowdsourcing platform to provide donors with greater levels of transparency through programs, donations integration with blockchain and automated withdrawals for charities.

APIs that were used are the following: PayPal, Paymongo for donations, Wise for automated charity program withdrawal, and lastly, Openzeppelin in conjunction with Web3 and Solidity to integrate any donation/withdrawal transaction to the blockchain.

Senior High Grading System — Github

Laravel —Designer & Developer

Modifying an existing grading system on Github(Unified Transform), to a system that can be used by Senior High admin, faculty, and students to grade and track their grades and attendance.

LigtasPH — Github

ASP.NET—Designer & Developer

Report small crime incidents or accidents using Google Maps. The data is processed through ASP.NET web API and MSSQL.

Barangay Quarantine Tracker— Link

Laravel —Designer & Developer

An easy to use web app for barangay officials to track daily health information for probable Covid-19 patients on their barangay.
